# A Few of the Saturday Specials in the Readyto-Wear Department. CANDIDATES FOR STEWARD

We are constantly adding to our splendid line of White Lawn Waists. A couple of the latest have been very favorably received.

One in particular is a waist worth \$1.00 that we offer for 89c It would be just as easy to write that it's worth \$1.25—and compared with prices, perhaps, at other places we might be justified in saying sobut according to our standard of value and price it wouldn't be true. It is a regular dollar waist, though, and our price of 89c is a special one. It's a sheer quality of lawn, made with six perpendicular rows of wide embroidery and nice pearl battons.

Another handsome White Waist is a very sheer India linon, made with 38 small tucks and is hemstitched across the entire front. This waist s a very neat design, and has deep cutis and collar finished to match—\$1.98.

We have many other styles from 50c to \$5.00.

#### New Skirts.

Unlined skirts are much in vegue this season, and to have the proper fit and hang the seams must be bound. You'll find ours to be correct in every detail.

Among them is an All-Wool Broadcloth, trimmed with taffeta bands and every seam tailor finished. This skirt is in black, navy, castor and gray \$5.98.

Our Basket Weave Cleth Skirts at \$7.50, while not united, yet are very light weight and very dreasy in appear-ance, having a flounced bottom and being nicely trimmed.

Manufacturing Lines Show Especial Activity; Iron and Steel, Lumber, Cotton Goods, Coal Mining and Machinery Boosting All.

(By Associated Press.) NEW YORK, April 11.-Bradstreet's tonorrow will say: While cross currents in trade make it

difficult to characterize the general trade situation the country over, appearances would indicate that the check \_.ven distributive trade by reactionary weather, crop uncertainties and additional friccrop uncertainties and additional fric-tion in industrial circles is of a transition in industrial circles is of a transi-tery character. Eank clearings, all things considered, are of large volume, railroad earnings reports to Bradstreet a points to continued increases over the same period a year ago, and especial activity is noted in leading manufacturing lines, principally iron and steel, lum-ber, cotton goods, coal mining, machin-ery making and a host of lesser industries. Jobbing distribution at the central west and at leading eastern centers notes a further toning down, but in the spring wheat sections reports are of undiminished activity. Southwestern trade re-ports continue of a cheerful nature. At industrial centers in the South iron, coal and coke production is active and while the backward weather conditions are credited with limiting demand in agri-cultural sections, the strength of cotton prices leads to a more hopeful teeming there, not entirely warranting the pre-dictions of a reduced acreage in that staple crop.

Despite the lowering in the general average of wheat as a result of the dry weather of last fall and the early winter, indicated by the government restill for a crop in excess of 400,000,00 bushels, and about equal, in fact, to the seems to be progressing well. As to corn crop, little doubt exists that a large

that very large sales for delivery between October, 1802, and April, 1802, agregating 225,000 tons, have been closed. Foundry and forge iron are also firmer.

CERCAL PRICES.

Cercal prices moved within narrow limits early, pending the publication of the Government report, some strength being imparted by reports of better export demand and cold weather interfering with the growing crop, but this strength disappeared later, and the report itself, though claimed to be a surprise, exercised little effect, the uet changes for the week being very slight.
